

BUILDING SPECIFICATIONS

FOUNDATION AND STRUCTURE

Foundations using reinforced concrete slabs, according to the data of the geotechnical study, complying with building standard CTE-DB-SE-C. Concrete walls in the basement. Structure using bidirectional waffle-slabs and reinforced concrete slabs. All the above in compliance with current DB-SE and EHE standards.

ROOF

Inverted non-transitable roof, finished with gravel. Waterproofing using asphalt sheets and high-density thermal insulation with polystyrene panels.

WATERPROOFING

External waterproofing of basement walls with a perimeter draining system. Waterproofing of roofs and terraces using welded asphalt sheets and the additional requests that the geotechnical engineer may require. All the above in compliance with current DB-HS standards.

INSULATION

Thermal and acoustic insulation on the roof using Roofmate-type rigid extruded polystyrene pieces. Thermal and acoustic insulation on the façade, achieved by way of an air chamber and semi-rigid rock wool. In addition to the above, there is also soundproofing between the house's rooms using rock wool inside the dividing walls. All this is in compliance with current DB-HE and DB-HR standards.

FACADES

Outer walls made of a ½ perforated brick external layer, water-resistant mortar pointing, air chamber and a self-supporting system of gypsum plasterboards (15) mounted on a metal structure of galvanized sheeting, with insulated and soundproofed using rock wool. Built in compliance with CTE-DB-HE Energy saving, and CTE-DB-HS Health standards.

PARTITION-WALLS

The partition walls are made using a galvanized steel sheet supporting structure, onto which a 15 mm-thick gypsum plasterboard is screwed on each side with rock wool sound insulation between them. Waterproof gypsum plasterboard has been allowed for on the walls of kitchen and bathrooms. Made in compliance with CTED8-HE regulations on Energy Saving, UNE 102040 IN on assembly of plaster partition walls on metallic structures.

CLADDING

Exterior: Rendering coat with mortar cement and paint for exteriors and ceramic cladding in decorative details. y pintura para exteriors, y aplacado cerámico en detalles decorativos.
Interior: Gypsum plasterboards painted, false ceilings
